OVERVIEW

IntegriWard (WARD) and Quaternary Resource Investigations, LLC (QRI) are in an All-Small Mentor Protégé Program (ASMPP) relationship and have formed a Joint Venture called WQRI Joint Venture, LLC. The difference between this JV and other Federal JVs is that all three companies, WARD + QRI = WQRI use the same operational processes and utilize each other's resources to enhance profits, thus operating as one company, yet separate. QRI was founded in 1986 serving the oil-petrochemical-utility market to remediate their process water impoundments in the Southeastern and Southwestern regions of the USA. WARD was founded in 2011 and is headquartered in San Antonio, Texas. WARD provides facility support, construction, and security installation services to Federal and Non-Federal clients and have project offices and personnel in thirty states and territories. WARD specializes in providing these services across CONUS at Federal and Non-Federal sites including law enforcement facilities, training compounds, research laboratories, medical centers, military installations, and school districts.
